

To whom it may concern

02 March 2021

Certificate of Conformity

We are pleased to confirm that the Zarges Teletower mobile scaffold conforms to the requirements of current safe working practices and the Work at Height regulations.

There are not, as yet, any standards in place in the UK for low level work platforms or mobile scaffold below 2.50 metres. The Teletower is designed to fully conform to the mobile scaffold standard EN1004 but does not comply as the platform height is below 2.5 metres. The Teletower is designed to conform to any future standards for low-level access platforms.

The Teletower is manufactured within an ISO 9001 certificated company and quality control is undertaken by a separate in-house quality department.

The Teletower carries a 12 month manufacturer's warranty.

Yours faithfully
